## **Capital Protection Certificate**

- Underlyings: MSCI® Europe Top ESG Select 4.5% Decrement Index and MSCI® North America Top ESG Select 4.5% Decrement Index
- 20% yield, if the underlying is at or above its starting value at the end of the term
- 100% capital protection after 3.5 year term

Please note the issuer risk.

Further information on the payout profile, underlying and the risks can be found on the following pages.

The financial instrument described herein is based on an MSCI® indices.

There are 2 possible redemption options for this certificate, depending on the price of the underlying at the end of the term:

- 1. underlyings at or above the starting value: redemption of 120%
- 2. at least one underlying below the starting value: 100% capital protection at maturity

The underlyings of the certificate are the MSCI® Europe Top ESG Select 4.5% Decrement Index and the MSCI® North America Top ESG Select 4.5% Decrement EUR Index. It consists of companies that meet sustainability criteria. A higher weighting is given to companies that are actively shaping the transition to an emission-free future.

#### How the certificate works

At the initial valuation date the starting values of the underlyings are determined. At the final valuation date the closing prices of the underlyings are compared to the starting values and one of the following scenarios will apply:

- 1. If the closing prices of both underlyings quote at or above their starting values, you will receive 120% of the nominal amount at the maturity date.
- 2. If the closing price of at least one of the underlyings quotes below its starting value, capital protection takes effect and you will receive 100% of the nominal amount at the maturity date (capital protection).

Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying.

Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at raiffeisenzertifikate.at/en/bail-in. A total loss of the invested capital is possible.

Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be

subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The price of the Capital Protection Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Certificate during the term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a substantial loss of the invested capital ("market risk"). The capital protection of 100% of the nominal value applies solely at the end of the term. Loss of value due to inflation is not covered by the capital protection. During the term, the price of the Capital Protection Certificate may drop below the agreed capital protection amount. During the term, the Capital Protection Certificate's price is subject to several influencing factors and needs not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a partial loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Capital Protection Certificate and are not paid out.
