Information on the term

The Underlying

The STOXX $^{\circ}$ Global Select Dividend 100 contains only equities that are included in the STOXX $^{\circ}$ Global 1800 Index (investment universe).

Further criteria for inclusion in the underlying are:

Global: 40 shares from North America, 30 from Europe, 30 from Asia/Australia

Select Dividend: Growth, regularity and amount of dividend payments as criteria for inclusion

Price index: Dividends paid out are not reinvested in the index, but are used by the issuer to define the payout profile.

Please note:

- 90% of the nominal amount will in any case be paid out at maturity; during the term, the price may fall below the issue price or the capital protection level. Selling the certificate prior to maturity may result in a partial loss of the invested capital.
- The maximum repayment is limited to 124% (of the nominal amount).
- Loss of purchasing power due to inflation is not offset by the capital protection.

Issuer risk / creditor participation: Certificates are not covered by the deposit protection system. There is a risk that Raiffeisen Bank International AG may not be able to meet its payment obligations due to insolvency (issuer risk) or any official orders ("bail-in"). In such cases, the invested capital may be lost in full.

* Raiffeisen Centrobank AG is a 100% owned subsidiary of Raiffeisen Bank International AG – rating of RBI: www.rbinternational.com/ir/ratings

 Early closing or extension of the subscription period is within the sole discretion of Raiffeisen Centrobank AG. The past years were characterised by a low interest rate environment. The lack of investment opportunities forced many investors to seek for more profitable alternatives. Consequently, dividend yielding shares have become an integral part of many investment portfolios. However, investments into shares remain risky and are only suited to investors who are prepared to take a certain amount of market risk.

For cautious investors who expect a stable performance of the STOXX® Global Select Dividend 100 index over the next 6 years, the Dividend Stocks Bond 90% II presents a suitable investment opportunity. The certificate offers the opportunity to obtain a yield of 24% (3.6% p.a.) if the index quotes at or above 100% of its starting value at the end of the term. If the underlying quotes lower than 100% but not below 90% of the starting value at the end of the term, the redemption will be at 100% of the nominal value. If the index is below 90% of its starting value after 6 years, the capital protection of 90% will apply at the end of the term. Further details regarding opportunities and risks are listed on the next page.

FUNCTIONALITY

- At the initial valuation date the closing price of the STOXX® Global Select Dividend 100 index is determined as **starting value**.
- At the final valuation date the closing price of the index is compared to the starting value and **one of the following scenarios will apply**:

SCENARIO 1: Index AT or ABOVE 90% of the starting value

A) Index \geq 100% of the starting value \rightarrow redemption at 124%

If the closing price of the index at the final valuation date is equal to or higher than the starting value, the redemption on the maturity date will be at 124% of the nominal value. This equals the maximum amount of EUR 1,240 per value.

B) Index \geq 90% and < 100% of the starting value \rightarrow redemption at 100%

If the closing price of the index at the final valuation date is less than 100% but at least 90% of the starting value, the payout at the maturity date will be 100% of the nominal value. This equals EUR 1,000 per nominal amount.

SCENARIO 2: Index BELOW the starting value

If the closing price of the index at the final valuation date is below 90% of the starting value, the capital protection will apply and the certificate will be repaid on the maturity date at 90% of the nominal value (equivalent to EUR 900 per nominal value).

STOXX® GLOBAL SELECT DIVIDEND 100

As of: March 9, 2020; Source: Reuters (.SDGP) ISIN: US26063V1180

The 90% capital protection by Raiffeisen Centrobank AG only applies at maturity, i.e. during the term the certificate price may drop below 90%, but the investor obtains at least 90% of the nominal value at the end of the term.

OPPORTUNITIES

Yield opportunity:

This Certificate enables investors who do not wish to invest into single shares to obtain yield if the index quotes higher or is unchanged at the end of the term.

90% capital protection:

The Dividend Stocks Bond 90% II is 90% capital protected at the end of the term, i.e. at maturity the investor obtains at least 90% of the nominal value.

• Flexibility:

Tradability on the secondary market, no management fees

RISKS

Risk of loss if the index performance is negative:

If the closing price of the STOXX® Global Select Dividend 100 index is below 90% of its starting value at the final valuation date, investor will incure a loss of 10% of the nominal value (based on the issue price of 100%).

Capital protection only at the end of the term:

During the term the price of the certificate may drop below 90%; the capital protection applies exclusively at the end of the term. Loss of value due to inflation is not covered by the capital protection.

Issuer risk / Bail-in:

Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

The price of the Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Certificate during the term. If the Certificate is sold prior to the end of the term, there is the risk to incur a substantial loss of the invested capital (market risk). The capital protection of 90% of the nominal value applies solely at the end of the term. During the term, the price of the Capital Protection Certificate may drop below the agreed capital protection amount. During the term, the Capital Protection Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Certificate is sold prior to the end of the term, there is the risk to incur a partial loss of the invested capital. The Capital Protection Certificate's final terms may provide for a maximum payout. If the underlying is not quoted in the same currency as the Capital Protection Certificate and if the Certificate is not currency hedged, the foreign exchange rate influences the Capital Protection Certificate's price during the term (currency risk). Dividends and similar rights associated with the underlying are taken into account when structuring the Certificate and are not paid out.

Issuer Risk/Creditor Participation ("bail-in"): Any payments for structured securities during the term or at the end of the term depend on the solvency of the issuer (issuer risk). Investors are exposed to the risk that Raiffeisen Centrobank AG as an issuer might be unable to fulfil its obligations in respect of the described financial instruments, such as in the event of insolvency (inability to pay/overindebtedness) or a legal order to initiate resolution measures. The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer as uspend investors' rights. A total loss of the capital invested is possible. More detailed information is available at <u>www.rcb.at/en/Dasag</u>. Under certain circumstances, the issuer has the right to redeem the certificate prior to the maturity date. A total loss of the capital invested is possible. Past performance is no reliable indicator of tuture results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.
