Information on the term

Please note:

- 90% of the nominal amount will in any case be paid out at maturity; during the term, the price may fall below the issue price or the capital protection level. Selling the certificate prior to maturity may result in a partial loss of the invested capital.
- Loss of purchasing power due to inflation is not offset by the capital protection.

Issuer risk / creditor participation: Certificates are not covered by the deposit protection system. There is a risk that Raiffeisen Bank International AG may not be able to meet its payment obligations due to insolvency (issuer risk) or any official orders ("bail-in"). In such cases, the invested capital may be lost in full.

Megatrends are major social, economic, political and technological changes that have the potential to change the world sustainably. They usually lead to fundamental social change and can shape our everyday life permanently. Megatrends are particularly robust and withstand temporary resets without losing their momentum. Many investors are aware of their enormous importance and position themselves accordingly.

In order to enable investors to invest sustainably in megatrends, Raiffeisen Centrobank and the renowned index provider STOXX Ltd. collaborated to establish the ESG-compliant iSTOXX® Global Megatrends Select 50 Price EUR index which comprises businesses along the following nine megatrends: Infrastructure, Sharing Economy, Industry 4.0, Smart Cities, Housing Construction, Next Generation Telecoms, Millennials, Fintech and Silver Economy.

This index serves as underlying for the capital protection certificate **Megatrends Winner 90%**, which allows investors to participate 1:1 in the index development at the end of the term. Due to the capital protection of 90% at the end of the term, investors participate in price losses of the index only up to a maximum of -10%. The term of the certificate is 7 years. Details on opportunities and risks are presented on the following page.

FUNCTIONALITY

Beginning of the term:

At the initial valuation date the **closing price** of the iSTOXX® Global Megatrends Select 50 Price EUR index is determined as starting value.

End of the term:

At the end of the term, the performance of the iSTOXX® Global Megatrends Select 50 Price EUR index is evaluated. The index starting value is compared to the index closing price at the final valuation date. Investors participate at 100% in the performance of the underlying index. Investors also participate in price losses of up to -10%. In case of a negative index performance of more than 10%, the capital protection of 90% applies.

The **90% capital protection** by Raiffeisen Centrobank only applies at the end of maturity, i.e. during the term the certificate price may drop below 90%, but at the end of the term the investor obtains 90% of the nominal value in the worst case.

The price of the Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Certificate during the term. If the Certificate is sold prior to the end of the term, there is the risk to incur a substantial loss of the invested capital (market risk). The capital protection of 90% of the nominal value applies solely at the end of the term. During the term, the price of the Capital Protection Certificate may drop below the agreed capital protection amount. During the term, the Capital Protection Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Certificate is sold prior to the end of the term, there is the risk to incur a partial loss of the invested capital. The Capital Protection Certificate's final terms may provide for a maximum payout. If the underlying is not quoted in the same currency as the Capital Protection Certificate and if the Certificate is not currency hedged, the foreign exchange rate influences the Capital Protection Certificate's price during the term (currency risk). Dividends and similar rights associated with the underlying are taken into account when structuring the Certificate and are not paid out.

Issuer Risk/Creditor Participation ("bail-in"): Any payments for structured securities during the term or at the end of the term depend on the solvency of the issuer (issuer risk). Investors are exposed to the risk that Raiffeisen Centrobank AG as an issuer might be unable to fulfil its obligations in respect of the described financial instruments, such as in the event of insolvency (inability to pay/over-indebtedness) or a legal order to initiate resolution measures. The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. A total loss of the capital invested is possible. More detailed information is available at www.rcb.at/en/basag. Under certain circumstances, the issuer has the right to redeem the certificate prior to the maturity date. A total loss of the capital invested is possible.
