Listing	Stuttgart
Product currency	USD
Underlying currency	USD
Settlement method	Cash settlement
Taxation	Capital Gains Tax / no Foreign Capital Gains Tax

**DESCRIPTION**

With the **USD Nasdaq-100® Twin Win 2** certificate, investors participate at 100% in the performance of the Nasdaq-100® index up to a maximum of +45% compared to the starting value. As long as the barrier of 60% of the starting value is not violated during the term, any negative price performance at the end of the term will also be converted 1:1 into profit. In the event of a barrier violation by the underlying index, the investor is entirely subject to market risk. This means, in this case a substantial loss of the capital invested is possible.

**PRICE DEVELOPMENT SINCE ISSUE DATE**

Past performance is no reliable indicator of future results.

## Disclaimer

### Issuer Risk:

As a bearer bond, a certificate is not subject to Austria's deposit protection. If, in the event of insolvency, the issuer is unable to meet its obligations from the certificate, or is only able to meet them in part, certificate holders may lose a substantial part of the capital invested, or even a total loss. This risk is often also referred to as "issuer risk" or "creditworthiness risk".

### Possibility of Bail-in:

The Federal Act on the Recovery and Resolution of Banks ("BaSAG") applies. The BaSAG regulates the possibility of the regulatory resolution of banks that have run into difficulties. Holders of certificates may be affected by such a regulatory measure with their claims to payment(s) (the so-called "bail-in"), and this may result in the loss of a substantial part of the invested capital or even a total loss for all types of certificates.

## What You Should Consider Before the Purchase of Bonus Certificates:

- **Market risk:** The price of the Bonus Certificate is dependent on the underlying's performance. An unfavourable performance of the underlying may result in price fluctuations of the certificate during the term. This may result in a partial or even total loss of the invested capital.
- **Barrier event:** If the barrier of the Bonus Certificate is touched or undercut during the term, the protection mechanism is suspended. In this case, the investor is exposed to the market risk on a one-to-one basis and a substantial capital loss is possible. The redemption at the end of the term is then usually one-to-one with the underlying performance.
- **Price performance:** During the term, the certificate's price is not only dependent on the underlying's performance but on various influencing factors such as the underlying's volatility, interest rates, issuer's solvency or remaining term. Selling the Bonus Certificate prior to maturity may result in a partial or even total loss of the invested capital.
- **Yield limitation:** Depending on the product structure, a Bonus Certificate may have a maximum payout amount (e.g. cap/maximum amount or fixed interest amount).
- **Currency risk:** If the underlying quotes in a currency that is different and the product does not provide for currency hedging, changes in the exchange rate during the term of the Bonus Certificate will also affect the value of the certificate. This can additionally increase the loss from the Bonus Certificate due to the market risk.
- **Payouts of the underlying:** Dividends and comparable claims from the ownership of the underlying are taken into account in the certificate's structure and are not paid out.

Please also note our comprehensive information on our website [raiffeisencertificates.com/kundeninformation](https://raiffeisencertificates.com/kundeninformation) and [raiffeisencertificates.com/basag](https://raiffeisencertificates.com/basag)

Effective as of 1 December 2022 Raiffeisen Centrobank AG has transferred its certificates business to Raiffeisen Bank International AG including (i) all associated rights and obligations, and (ii) the legal position as issuer of existing securities, i.e. outstanding securities issued by Raiffeisen Centrobank AG. Therefore, as of 1 December 2022, Raiffeisen Bank International AG constitutes the issuer of and the debtor under the securities referred to in the product brochure.

Please be aware that the product brochure reflects the legal situation at the date of its creation and does not contain any updated information about the issuer.

# PROFIT FROM RISING AND FALLING PRICES

## In short:

With this certificate investors participate 100% in the performance of the underlying Nasdaq-100® index at the end of the term – up to a maximum of +45% compared to the starting value. As long as the barrier of 60% of the starting value is never touched or undercut, a negative price performance is converted 1:1 into profit at the end of the term. In the event of a barrier violation by the underlying index, the investor is entirely subject to market risk. This means, in this case a substantial loss of the capital invested is possible.

## FUNCTIONALITY

At the **initial valuation date** the **starting value** of the underlying is fixed and from that the **barrier** is determined. During the observation period the underlying price is compared to the barrier. On the **final valuation date** one of the following **scenarios** will apply:

### 1) Barrier not touched or undercut

a) If the underlying price **always** quoted **above** the barrier and the final value is **at** or **above** the cap, the maximum amount is paid out at the maturity date.

b) If the underlying price **always** quoted **above** the barrier and the final value is **below** the cap but **at** or **above** the starting value, redemption is affected at the maturity date according to the **underlying performance** (percentage performance from the starting value to the final value).

c) If the underlying price **always** quoted **above** the barrier and the final value is **below** the starting value, redemption is affected at the maturity date according to the **negative underlying performance** (negative performance is paid out as positive performance).

### 2) Barrier touched or undercut at least once

If the underlying price quoted **at** or **below** the barrier at least once, redemption is affected at the maturity date according to the **underlying performance** (percentage performance from the starting value to the final value).

## REDEMPTION PROFILE: EXEMPLARY PRESENTATION

## NOTE

The referenced opportunities and risks represent a selection of the most important facts regarding the product.

You are about to purchase a product that is not easy and difficult to understand.

For further information see the Base Prospectus (including possible amendments) – approved by the Austrian Financial Market Authority (FMA), deposited at the Oesterreichische Kontrollbank AG and published at [www.rcb.at/en/securitiesprospectus](http://www.rcb.at/en/securitiesprospectus) (we recommend reading the prospectus before making an investment decision) – and the key information document as well as „Customer Information and Regulatory Issues“ at [www.rcb.at/en/customerinformation](http://www.rcb.at/en/customerinformation).

## OPPORTUNITIES

- **Return opportunity:** Full participation in positive underlying performance up to the cap and transformation of negative into positive underlying performance up to the barrier
- **Safety buffer:** Partial protection against declining prices due to the initial safety buffer of 60% - barrier at 40% of the starting value
- **Flexibility:** Tradability on the secondary market, no management fees

## RISKS

- **No guaranteed minimum yield:** The payout of the certificate depends on the performance of the underlying. There is no guaranteed minimum payout.
- **Barrier violation:** In case of barrier violation, investors are entirely subject to market risk, without any protective mechanism. Close to the barrier, disproportionate price movements of the certificate can occur.
- **Currency risk:** As the certificate is quoted in USD, there is a currency risk for Euro investors.
- **Issuer risk / Bail-in:** Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

**DISCLAIMER**

In spite of all possible care taken, the data contained in this advertisement are provided purely as non-binding information. This advertisement constitutes neither investment advice nor, an offer nor a recommendation nor an invitation to execute a transaction. The information contained in this advertisement is generic and no consideration is given to the personal circumstances of potential investors. The information contained in this advertisement substitutes neither the necessary individual investment advice for the purchase or sale of investments nor shall any investment decision be taken on the basis of this document. This advertisement has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete information for all financial instruments described in this advertisement as well as the sole legal basis for potential transactions in one of the described financial instruments is the Base Prospectus (including any possible supplements) which has been approved by the Austrian Financial Market Authority (FMA) in connection with the corresponding Final Terms of the described financial instruments. The approved Base Prospectus (including any possible supplements) and the respective Final Terms have been deposited at the Oesterreichische Kontrollbank AG as the notification office. The approval of the Base Prospectus should not be construed as an endorsement of the financial instrument described herein by the FMA. Additional information on the financial instruments described herein may also be obtained from the respective key information documents (KIDs) that are available for download free of charge on the website of Raiffeisen Centrobank AG ([www.rcb.at](http://www.rcb.at)) by entering the International Securities Identification Number (ISIN) of the respective financial instrument. Unless otherwise explicitly expressed in any of the cited documents above, no measures have been taken in any national legal system which should permit a public offering of the products described therein. Raiffeisen Centrobank AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein. Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying. Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

**Issuer Risk/Creditor Participation ("bail-in"):** Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at [www.rcb.at/en/basag](http://www.rcb.at/en/basag). A total loss of the invested capital is possible. Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information. The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The Bonus Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), bond interest rates, solvency of the issuer or remaining term. If the Bonus Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Bonus Certificate and are not paid out.
