#### Price underlying (% of the starting value)

Past performance is no reliable indicator of future results. Less than five years have passed since the launch of this certificate.

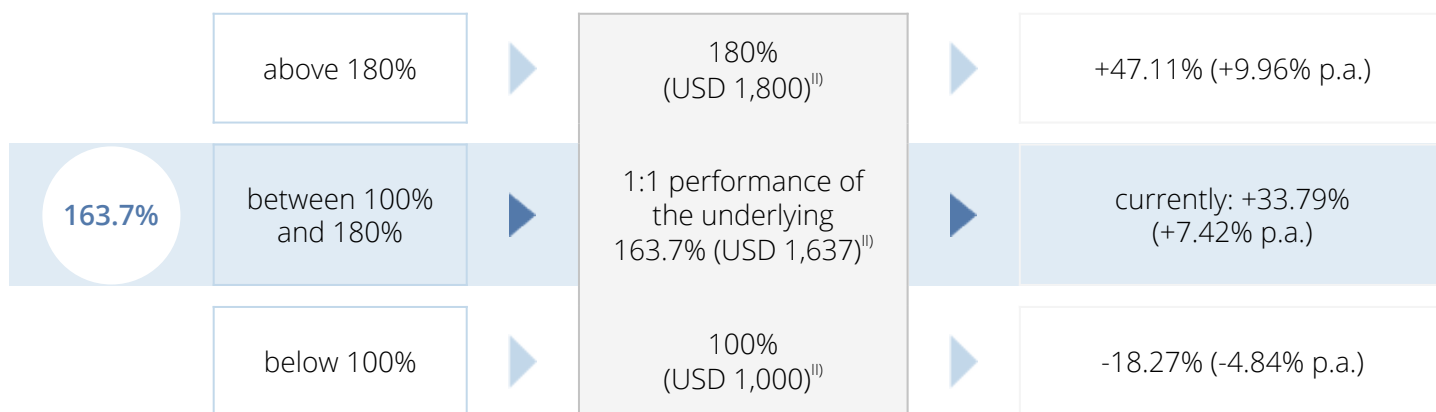

<b>Buy (Ask)</b>	122.36%
<b>Sell (Bid)</b>	120.86%
<b>Underlying</b>	<a href="#">Meta Platforms Inc Class A</a>
<b>Underlying ISIN</b>	<a href="#">US30303M1027</a>
<b>Starting price underlying</b>	USD 344.62
<b>Underlying price (indicative)</b>	USD 564.08 <b>163.7%</b> of the starting value

Last update: Nov 26, 2024, 11:20 am

## Repayment at the end of the term

Currently the underlying quotes **163.7%** ...and is in the range... at<sup>i)</sup> ...at the end of the term this would trigger the following repayment... If you buy the certificate at the current purchase price, this would correspond to the following return<sup>iii)</sup>:

<sup>i)</sup> compared to the starting price

<sup>ii)</sup> assumption: investment amount USD 1.000

<sup>iii)</sup> based on the current underlying price

## USD Meta Winner

### Capital Protection Certificate

ISIN: [AT0000A38GY2](#) / WKN: RC1BX3

### The Certificate

With the USD Meta Winner investors participate at 100% in the performance of the Meta share at the end of the term (December 2028) up to maximum of +80% in comparison to the starting value. In case of a negative index performance the capital protection of 100% applies at the end of the term.

Tradeable unit/ nominal value	USD 1,000
Product currency	USD
Underlying currency	USD
Taxation	Capital Gains Tax
Listing	Stuttgart
End of the term	4Y 0M 23D

Last update: Nov 26, 2024, 11:20 am

## Information on the term

Please note:

- 100% of the nominal amount will in any case be paid out at maturity; during the term, the price may fall below the issue price or the capital protection level. Selling the certificate prior to maturity may result in a partial loss of the invested capital.
- The maximum repayment is limited to 180% (of the nominal amount).
- Loss of purchasing power due to inflation is not offset by the capital protection.

Issuer risk / creditor participation: Certificates are not covered by the deposit protection system. There is a risk that Raiffeisen Bank International AG may not be able to meet its payment obligations due to insolvency (issuer risk) or any official orders ("bail-in"). In such cases, the invested capital may be lost in full.

Notes:

You are about to purchase a product that is not easy and difficult to understand. For further information see the Base Prospectus (including possible amendments) – approved by the Austrian Financial Market Authority (FMA), deposited at the Oesterreichische Kontrollbank AG and published at [raiffeisenzertifikate.at/en/securitiesprospectus](https://raiffeisenzertifikate.at/en/securitiesprospectus) (we recommend reading the prospectus before making an investment decision), in the key information document and among „Customer Information and Regulatory Issues“ at <https://www.raiffeisenzertifikate.at/en/customer-information>. The approval of the base prospectus by the competent authorities is not to be understood as an endorsement of the product by these authorities.

2 ... Early termination/extension of the subscription period is at the discretion of Raiffeisen Bank International AG.

### Functionality

At the initial valuation date the starting value of the underlying and at the final valuation date the final value is determined. At the final valuation date the closing price of the final value is compared to the starting value and one of the following scenarios will apply:

1. Final value  $\geq$  180% of the starting value → Redemption at 180%  
If the final value is greater or equal to 180 % of the initial value, 180% of the nominal value is paid out on the redemption date. This also represents the maximum redemption (maximum amount).
2. Final value  $\geq$  100% and  $<$ 180% of the starting value → 100% Participation  
If the final value is greater or equal to 100% or less than 180% of the starting value, certificate will be redeemed on the redemption date according to the performance of the underlying (percentage development from the starting value to the final reference value).
3. Final value  $<$  100% of the starting value → Redemption at 100%  
If the final value is less than 100% of the initial value, 100% of the nominal value (capital protection) is paid out on the redemption date.

### Example payout profile

Final value*	Redemption**
+100%	180%
+70%	170%
+40%	140%
+30%	130%
+10%	110%
+/-0% (= Starting value)	100%
-30%	100%

\* in comparison to the starting value    \*\* in percent of the nominal value

The nominal value is capital protected by Raiffeisen Bank International AG at the end of the term, i.e. during the term the price of the certificate can fall below the issue price, but at the end of the term investors obtain at least the capital protection amount.

For details on risks and opportunities please see the following pages.

## Underlying: Meta-Aktie

Meta is a US internet company, primarily known for the social networks Facebook and Instagram as well as the messaging apps WhatsApp and Messenger.

As of October 30, 2023; Source: Bloomberg (META.UQ); ISIN: US30303M1027

### Note

The referenced opportunities and risks represent a selection of the most important facts regarding the product.

You are about to purchase a product that is not easy and difficult to understand.

For further information, please refer to the base prospectus (including any supplements) approved by the competent authorities - published at [raiffeisenzertifikate.at/en/securities-prospectus/](https://raiffeisenzertifikate.at/en/securities-prospectus/) (we recommend reading the prospectus before making an investment decision) - and to the base information sheets as well as to "Customer information and regulatory matters" [raiffeisenzertifikate.at/customer-information](https://raiffeisenzertifikate.at/customer-information)

## Opportunities

- Return opportunity: Full participation in the performance of the underlying up to the cap
- Capital protection: At the end of the term, the investor obtains at least the capital protection amount.
- Flexibility: Tradability on the secondary market, no management fees

## Risks

- No guaranteed minimum yield: The payout of the certificate depends on the underlying performance. There is no guaranteed minimum payout.
- Capital protection only at the end of the term: During the term the price of the certificate may drop below the issue price. For example, strongly rising interest rates have a negative impact on the price performance of the certificate. Loss of value due to inflation is not covered by the capital protection. The capital protection applies exclusively at the end of the term.
- Currency risk: As the certificate is quoted in USD, there is a currency risk for Euro investors.
- Issuer risk / Bail-in: Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

In spite of all possible care taken, the data contained in this advertisement are provided purely as non-binding information. This advertisement constitutes neither investment advice nor an offer nor a recommendation nor an invitation to execute a transaction. The information contained in this advertisement is generic and no consideration is given to the personal circumstances of potential investors. The information contained in this advertisement substitutes neither the necessary individual investment advice for the purchase or sale of investments nor shall any investment decision be taken on the basis of this document. This advertisement has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete information for all financial instruments described in this advertisement as well as the sole legal basis for potential transactions in one of the described financial instruments is the Registration Document approved by the Luxembourg Financial Market Authority (CSSF) and the Securities Note approved by the Austrian Financial Market Authority (FMA) - both documents together form the Base Prospectus - together with any supplements and the respective Final Terms of the described financial instrument filed with the FMA. The approval of the Base Prospectus should not be construed as an endorsement of the financial instrument described herein by the competent authorities. Additional information on the financial instruments described herein may also be obtained from the respective key information documents (KIDs) that are available for download free of charge on the website of Raiffeisen Bank International AG ([raiffeisenzertifikate.at](https://www.raiffeisenzertifikate.at)) by entering the International Securities Identification Number (ISIN) of the respective financial instrument.

Unless otherwise explicitly expressed in any of the cited documents above, no measures have been taken in any national legal system which should permit a public offering of the products described therein.

Raiffeisen Bank International AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein.

Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying.

Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at [raiffeisenzertifikate.at/en/basag](https://www.raiffeisenzertifikate.at/en/basag). A total loss of the invested capital is possible.

Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact

on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The price of the Capital Protection Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Certificate during the term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a substantial loss of the invested capital ("market risk"). The capital protection of 100% of the nominal value applies solely at the end of the term. Loss of value due to inflation is not covered by the capital protection. During the term, the price of the Capital Protection Certificate may drop below the agreed capital protection amount. During the term, the Capital Protection Certificate's price is subject to several influencing factors and needs not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a partial loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Capital Protection Certificate and are not paid out.

Certificates issued by Raiffeisen Bank International AG are no financial products as defined in the Regulation (EU) 2019/2088.

Supervisory Authorities: Austrian Financial Market Authority (FMA), European Central Bank (ECB). Imprint according to the Austrian Media Act: Media Owner and Publisher is Raiffeisen Bank International AG, Am Stadtpark 9, 1030 Vienna/Austria.
