This certificate offers you an annual fixed interest rate of 7.25% as well as the option of early redemption. If the underlying is at or above the starting value on one of the annual valuation dates, (early) redemption is affected at 100%. If the underlying quotes below the barrier at the end of term, shares are delivered; the value of the shares delivered will be significantly lower than the nominal amount of the certificate.

How the certificate works

On the first valuation date the starting value of the underlying is fixed and the barrier is determined. On the annual valuation date, the price of the underlying is compared to the starting value. If the underlying is at or above the termination level, the certificate is redeemed (early) at the defined termination price.

The fixed interest rate is paid out in any case, regardless of the underlying performance. The yield is in any case limited to the fixed annual interest payments.

If there has been no early redemption by the last year of the term and the underlying price is also below the payout level on the final valuation date, the barrier is observed: If the underlying price is above the barrier, redemption is at 100% of the nominal amount. If the underlying price is at or below the barrier, you will receive shares in your securities account.

A defined number of shares are booked into your securities account. How many shares are delivered, if any, is already determined when the starting values are fixed:

Number of shares = nominal value / starting value

As a rule, this does not result in whole numbers. However, as only whole shares can be traded, the market value of the fractional share exceeding this is paid out:

Cash settlement = fractional share x final value

Complies with the sustainability standard for Raiffeisen certificates ESG raiffeisenzertifikate.at/en/sustainability

This means that both the issuer and the underlying asset, in their economic actions, take into account negative impacts on on the following sustainability factors:

Greenhouse gas emissions
