Valuation dates	Aug 16, 2022 / Aug 16, 2023 / Aug 15, 2024
(early) redemption amount	108.00% / 116.00% / 124.00%
Maturity date	Aug 20, 2024
Final valuation date	Aug 15, 2024
Issue date	Aug 18, 2021
Expected market trend	sideways, bullish
Listing	Stuttgart
Product currency	USD
Underlying currency	USD
Settlement method	Cash settlement / Physical delivery
Taxation	Capital Gains Tax / no Foreign Capital Gains Tax

DESCRIPTION

The certificate **USD Netflix Express 2** offers an annual opportunity for early redemption, enabling investors to obtain a yield of 8% per year if the share of Netflix Inc. quotes at or above its starting value at one of the valuation dates. If the share quotes below the starting value, the term extends by another year - up to a maximum of three years. In the event of a barrier violation at the final valuation date, the investor is entirely subject to market risk and physical delivery of Netflix shares is effected.

Disclaimer

Issuer Risk:

As a bearer bond, a certificate is not subject to Austria's deposit protection. If, in the event of insolvency, the issuer is unable to meet its obligations from the certificate, or is only able to meet them in part, certificate holders may lose a substantial part of the capital invested, or even a total loss. This risk is often also referred to as "issuer risk" or "creditworthiness risk".

Possibility of Bail-in:

The Federal Act on the Recovery and Resolution of Banks ("BaSAG") applies. The BaSAG regulates the possibility of the regulatory resolution of banks that have run into difficulties. Holders of certificates may be affected by such a regulatory measure with their claims to payment(s) (the so-called "bail-in"), and this may result in the loss of a substantial part of the invested capital or even a total loss for all types of certificates.

Express Certificates

What You Should Consider Before the Purchase:

- **Market risk:** The value of the Express Certificate depends on the value of the underlying asset. Unfavourable developments of the underlying can therefore cause fluctuations in the value of the Express Certificate. This can lead to the loss of part of the invested capital or even to a total loss.
- **Barrier event:** If the barrier of the Express Certificate is touched or undercut on the last valuation date, the protection mechanism is suspended. In this case, the investor(s) is/are exposed to the market risk on a 1:1 basis and a substantial loss of capital is possible. Redemption at the end of the term is then usually 1:1 to the underlying performance, or in the case of Express Certificates on individual shares, in the form of physical delivery of shares. The market value of delivered shares will be below the nominal value of the certificate.
- **Price performance:** The price of the Express Certificate depends on several influencing factors during the term and does not exclusively follow the performance of the underlying. Such influencing factors are, for example, volatility (intensity of value fluctuations), the interest rate level or the remaining term, as well as the credit rating of the issuer. If the Express Certificate is sold before the end of the term, this can lead to the loss of part of the capital invested or even to a total loss.
- **Price performance:** The price of the Express Certificate depends on several influencing factors during the term and does not exclusively follow the performance of the underlying. Such influencing factors are, for example, volatility (intensity of value fluctuations), the interest rate level or the remaining term, as well as the credit rating of the issuer. If the Express Certificate is sold before maturity, this can lead to the loss of part of the capital invested or even a total loss.
- **Currency risk:** If the underlying asset is quoted in a different currency than the Express Certificate and the product does not provide for currency hedging, developments in the exchange rate during the term of the Express Certificate will also have an impact on the value of the certificate. This can additionally increase the loss from the Express Certificate due to the market risk.
- **Payouts of the underlying:** Dividends and comparable claims from the ownership of the underlying are taken into account in the certificate's structure and are not paid out.

Please also note our comprehensive information on our website raiffeisencertificates.com/kundeninformation and raiffeisencertificates.com/basag

Effective as of 1 December 2022 Raiffeisen Centrobank AG has transferred its certificates business to Raiffeisen Bank International AG including (i) all associated rights and obligations, and (ii) the legal position as issuer of existing securities, i.e. outstanding securities issued by Raiffeisen Centrobank AG. Therefore, as of 1 December 2022, Raiffeisen Bank International AG constitutes the issuer of and the debtor under the securities referred to in the product brochure.

Please be aware that the product brochure reflects the legal situation at the date of its creation and does not contain any updated information about the issuer.

¹ Early closing or extension of the subscription period is within the sole discretion of Raiffeisen Centrobank AG.

The **USD Netflix Express 2** certificate combines the opportunity to generate an attractive yield with the possibility of early redemption. The share of the American video-on-demand provider Netflix Inc. serves as underlying for the certificate. For investors who expect the price of this stock to rise or at least remain constant over the next three years, the Express Certificate offers an annual yield opportunity of 8% of the nominal value. The certificate has a term of at least one and not more than three years. Further details regarding opportunities and risks are presented on the following page.

FUNCTIONALITY

At the **initial valuation date** the closing price of the Netflix Inc. share is fixed as **starting value** and the **barrier** (60% of the starting value) is determined. The starting value also represents the **termination level**.

At the **annual valuation dates** the **closing price of the Netflix Inc. share** is compared to the **termination level**. If the share closing price quotes at or above the termination level at one of the valuation dates, the certificate is redeemed at the predefined termination price:

TERM	TERMINATION LEVEL	TERMINATION PRICE	YIELD
1 st year:	100% = starting value	108% of the nominal value	1 x 8%
2 nd year:	100% = starting value	116% of the nominal value	2 x 8%
3 rd year:	100% = starting value	124% of the nominal value	3 x 8%

→ THE TERMINATION PRICE INCREASES WITH THE TERM

If the share quotes below the starting value at the annual valuation date, the term extends by another year (up to a maximum term of three years). At the same time, the **potential annual termination price rises by 8% of the nominal value annually** (up to a maximum of 124%).

If the certificate is not redeemed in the first two years and provided that the closing price of the share quotes below the termination level at the third and **final valuation date**, an additional safety mechanism applies. If the share quotes above the barrier of 60% of the starting value, **redemption is effected at 100% of the nominal value**. This means that if the share price did not decline by 40% or more compared to the starting value by the end of the term, investors obtain the nominal value of USD 1,000 at maturity. If the closing price of the share is at or below the barrier at the final valuation date, the investor receives shares of Netflix Inc. in the **amount predefined** at the initial valuation date (nominal value/starting value). The difference to the next whole number is paid out.

DEFINED NUMBER OF SHARES

The number of shares to be delivered is determined as follows: **Number of shares = nominal value / starting value**

Usually this does not result in whole numbers. Due to the fact that shares are traded in whole numbers only, in the event of physical delivery the residual value is paid out in cash (=cash settlement) according to the market value: **Fraction of the shares x closing price of the share at the final valuation date = cash settlement**

The certificate USD Netflix Express 2 provides for **physical delivery** of the shares. In the most unfavourable case, the investor gets shares of Netflix Inc. at the end of the term.

NOTE

The referenced opportunities and risks represent a selection of the most important facts regarding the product.

You are about to purchase a product that is not easy and difficult to understand.

For further information see the Base Prospectus (including possible amendments) – approved by the Austrian Financial Market Authority (FMA), deposited at the Oesterreichische Kontrollbank AG and published at www.rcb.at/en/securitiesprospectus (we recommend reading the prospectus before making an investment decision), in the key information document and among „Customer Information and Regulatory Issues“ at www.rcb.at/en/customerinformation

Barrier and calculation of the number of shares:

SHARE	STARTING VALUE 100%*	BARRIER 60%	NUMBER OF SHARES (nominal value/starting value)
Netflix Inc.	USD 535.96	USD 321.576	1.8658 shares**

* ... starting value based on the closing price of the Netflix Inc. share as of Jul 7, 2021 at USD 535.96; Source: Bloomberg (NFLX), ISIN: US64110L1061; ** ... The fraction of the shares is paid out.

Currency risk/opportunity: This certificate is not currency hedged. If the cash flows from the certificate (repayment) are later converted into another currency, additional risks as well as opportunities arise from possible fluctuations of the currency price in relation to the nominal value.

OPPORTUNITIES

- **Yield opportunity:** Opportunity to obtain yield if the share price of Netflix Inc. remains constant or increases.
- **Possible early redemption:** Early redemption at the predefined termination price if the share quotes at or above the termination level at one of the valuation dates.
- **Flexibility:** Tradability on the secondary market, no management fees

RISKS

- **Limited yield opportunity:** The maximum yield is limited to 8% per annum. If the share of Netflix Inc. does not quote at or above the termination level at any of the three valuation dates, no (early) redemption at the predefined termination price will be effected and investors will not obtain any yield.
- **Barrier violation:** If the barrier is violated at the final valuation date, investors receive Netflix Inc. shares in the amount predefined and are entirely subject to market risk, without any protective mechanism. In the event of a physical delivery, the market value of the delivered shares will be less than the nominal value. Close to the barrier, disproportionate price movements of the certificate can also occur during the term.
- **Currency risk:** As the certificate is quoted in USD, there is a currency risk for Euro investors.
- **Issuer risk / Bail-in:** Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

DISCLAIMER

In spite of all possible care taken, the data contained in this advertisement are provided purely as non-binding information. This advertisement constitutes neither investment advice nor an offer nor a recommendation nor an invitation to execute a transaction. The information contained in this advertisement is generic and no consideration is given to the personal circumstances of potential investors. The information contained in this advertisement substitutes neither the necessary individual investment advice for the purchase or sale of investments nor shall any investment decision be taken on the basis of this document. This advertisement has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete information for all financial instruments described in this advertisement as well as the sole legal basis for potential transactions in one of the described financial instruments is the Base Prospectus (including any possible supplements) which has been approved by the Austrian Financial Market Authority (FMA) in connection with the corresponding Final Terms of the described financial instruments. The approved Base Prospectus (including any possible supplements) and the respective Final Terms have been deposited at the Oesterreichische Kontrollbank AG as the notification office. The approval of the Base Prospectus should not be construed as an endorsement of the financial instrument described herein by the FMA. Additional information on the financial instruments described herein may also be obtained from the respective key information documents (KIDs) that are available for download free of charge on the website of Raiffeisen Centrobank AG (www.rcb.at) by entering the International Securities Identification Number (ISIN) of the respective financial instrument.

Unless otherwise explicitly expressed in any of the cited documents above, no measures have been taken in any national legal system which should permit a public offering of the products described therein. Raiffeisen Centrobank AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein.

Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying. Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at www.rcb.at/en/basag. A total loss of the invested capital is possible.

Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The price of the Express Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Express Certificate. If the Express Certificate is sold, there is the risk to incur a substantial loss or even a total loss of the invested capital ("market risk"). The Express Certificate is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Express Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital (price performance). Dividends and similar rights associated with the underlying are taken into account when structuring the Express Certificate and are not paid out.

Certificates issued by RCB are no financial products as defined in the Regulation (EU) 2019/2088
