DESCRIPTION

With the certificate **12.5% Europe Reverse Convertible Bond** investors obtain an annual fixed interest rate of 12.5%. Whether the nominal value is returned at the end of the term or whether physical delivery of shares is effected depends on the performance of the underlying shares. In case of physical delivery of shares at the end of term, a predefined number only of the share with the worst performance is delivered. In this case investors are entirely subject to market risk.

The barrier has been touched by Koninklijke Philips NV on Nov. 3, 2022

* Raiffeisen Centrobank AG is a 100 % owned subsidiary of Raiffeisen Bank International AG – rating of RBI: www.rbinternational.com/ir/ratings

FUNCTIONALITY

At the **initial valuation date,** the **starting value** of the underlyings are determined and based on that the **barriers** are defined. During the **observation period** the underlying prices are compared with the respective barrier. At **the final valuation date** one of the following **scenarios** will apply:

1) Barrier not touched or undercut

If the underlying prices **always** quoted **above** their respective barrier, **100% of the nominal value** is paid out at the maturity date. This also represents the maximum amount.

2) Barrier touched or undercut at least once

a) If **at least one** underlying price quoted **at** or **below** its respective barrier but the **final values** of all underlyings quote **at** or **above** their respective starting values, **100% of the nominal value** will be paid out at the maturity date.

b) If **at least one** underlying price quoted **at** or **below** its respective barrier and the **final value** of at least one underlying quotes **below** the respective starting value, **physical delivery of shares** is effected. Regardless of which underlying violated the barrier, only the underlying with the **worst performance** (percentage performance from the starting value to the final value) shall be delivered to the securities account.

The **fixed interest rate** is paid out **in any case,** regardless of the performance of the underlying shares.

PHYSICAL DELIVERY OF SHARES

A defined number of the share with the worst performance is booked into the investor's securities account. The number is calculated as follows:

Number of shares = nominal value / starting value

Usually this does not result in whole numbers. Due to the fact that shares are traded in whole numbers only, in the event of physical delivery the residual value is paid out in cash (= cash settlement) according to the market value:

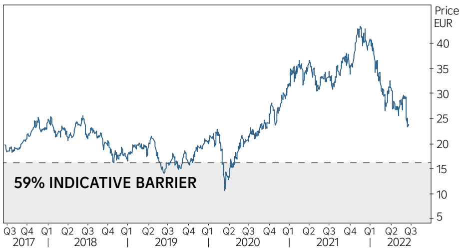
Cash settlement = fraction of the shares x final value

Further details regarding opportunities and risks are listed on the next page.

INFINEON TECHNOLOGIES SHARE

German technology company

The German group Infineon Technologies AG is a leading global producer of semiconductor solutions. The company focuses on energy efficiency, mobility and security.

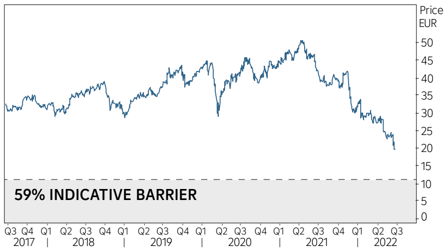


DE0006231004

KONINKLIJKE PHILIPS SHARE

Dutch health care technology company

The Dutch group Koninklijke Philips N.V. is one of the leading suppliers in the field of healthcare technologies. With solutions for prevention, diagnostics, therapy and care, the company covers all phases of health development.

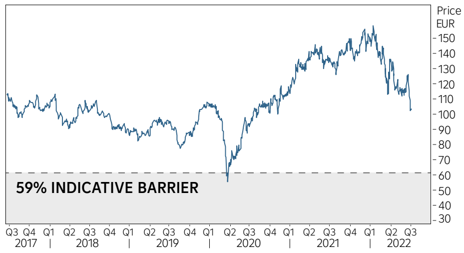


NL0000009538

SIEMENS SHARE

German technology company

The German technology group Siemens AG, headquartered in Munich, is active in the fields of energy, medical technology, industry, infrastructure and urban development.



DE0007236101

As of June 17, 2022; Source: Reuters (IFXGn.DE, PHG.AS, SIEGn.DE)
Please note that past performance is no reliable indicator for future results.

The certificate provides for **physical delivery** of shares. In the most unfavourable case, instead of a repayment of the nominal value the investor receives only the share with the worst performance delivered into the securities account.

NOTE

The referenced opportunities and risks represent a selection of the most important facts regarding the product.

You are about to purchase a product that is not easy and difficult to understand.

For further information see the Base Prospectus (including possible amendments) – approved by the Austrian Financial Market Authority (FMA), deposited at the Oesterreichische Kontrollbank AG and published at www.rcb.at/en/securitiesprospectus (we recommend reading the prospectus before making an investment decision) – in the key information document and among „Customer Information and Regulatory Issues" at www.rcb.at/en/customerinformation

OPPORTUNITIES

- **Attractive fixed interest rate:** The fixed annual interest rate (12.5% p.a.) is paid out regardless of the performance of the underlying shares.
- **Safety buffer:** Partial protection against price losses due to the initial safety buffer of 41% - barrier at 59% of the respective starting value
- **Flexibility:** Tradability on the secondary market, no management fees

RISKS

- **Limited yield opportunity:** The opportunity for yields is in any case limited to the fixed interest rate. Investors do not participate in price increases of the underlyings beyond their respective starting values.
- **Barrier violation:** If the respective barrier is touched or undercut, the investor is entirely subject to market risk, without any protective mechanism. Close to the barrier, there can be disproportionate price movements of the reverse convertible bond.
- **Issuer risk / Bail-in:** Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

Please take note of the disclaimer at the end of this marketing communication.

DISCLAIMER

In spite of all possible care taken, the data contained in this advertisement are provided purely as non-binding information. This advertisement constitutes neither investment advice nor, an offer nor a recommendation nor an invitation to execute a transaction. The information contained in this advertisement is generic and no consideration is given to the personal circumstances of potential investors. The information contained in this advertisement substitutes neither the necessary individual investment advice for the purchase or sale of investments nor shall any investment decision be taken on the basis of this document. This advertisement has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete information for all financial instruments described in this advertisement as well as the sole legal basis for potential transactions in one of the described financial instruments is the Base Prospectus (including any possible supplements) which has been approved by the Austrian Financial Market Authority (FMA) in connection with the corresponding Final Terms of the described financial instruments. The approved Base Prospectus (including any possible supplements) and the respective Final Terms have been deposited at the Oesterreichische Kontrollbank AG as the notification office. The approval of the Base Prospectus should not be construed as an endorsement of the financial instrument described herein by the FMA. Additional information on the financial instruments described herein may also be obtained from the respective key information documents (KIDs) that are available for download free of charge on the website of Raiffeisen Centrobank AG (www.rcb.at) by entering the International Securities Identification Number (ISIN) of the respective financial instrument.

Unless otherwise explicitly expressed in any of the cited documents above, no measures have been taken in any national legal system which should permit a public offering of the products described therein.

Raiffeisen Centrobank AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein.

Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying.

Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at www.rcb.at/en/basag. A total loss of the invested capital is possible.

Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The price of the Reverse Convertible Bond is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Reverse Convertible Bond. If the Reverse Convertible Bond is sold, there is the risk to incur a substantial loss or even a total loss of the invested capital ("market risk"). The Reverse Convertible is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Reverse Convertible Bond is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital (price performance). Dividends and similar rights associated with the underlying are taken into account when structuring the Reverse Convertible Bond and are not paid out.

Certificates issued by RCB are no financial products as defined in the Regulation (EU) 2019/2088
