In recent years, people have increasingly focused on environmental, social and societal (ESG) criteria not only in everyday decisions but also in investing. Therefore, many investors have become interested in investing in the stock market of sustainable companies, but may still be averse to the full market risk. The **Premium ESG Protected Certificate**, which is based on the global stock index of sustainable companies STOXX® Global ESG Leaders Select 50, can be the solution to this dilemma.

### UNDERLYING: STOXX® GLOBAL ESG LEADERS SELECT 50 INDEX

- **Best ESG Companies:** ecological, social and governance criteria  
E - Environmental Leaders, S - Social Leaders, G - Governance Leaders
- **Exclusion criteria:** Companies considered non-compliant with the UN Global Compact principles are explicitly excluded from the index

### THE UN GLOBAL COMPACT PRINCIPLES CONTAIN:

- **Labor standards:** Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining, as well as advocating the elimination of all forms of forced labor, the abolition of child labor and the elimination of discrimination in employment.
- **Human rights:** Companies should support and respect the protection of international human rights within their sphere of influence and ensure that they are not complicit in human rights violations.
- **Environmental Protection:** Companies should support a precautionary approach to dealing with environmental problems, take initiatives to create a greater sense of responsibility for the environment, and promote the development and diffusion of environmentally friendly technologies.
- **Fighting corruption:** Businesses should stand up against all forms of corruption, including extortion and bribery.

### FUNCTIONALITY

**At the initial valuation date**, the starting value of the STOXX® Global ESG Leaders Select 50 index is determined (closing price as of 10.06.2021).

**At the end of the term**, the performance of the STOXX® Global ESG Leaders Select 50 index is evaluated. This means at the final valuation date (06.06.2029) the index closing price is compared to the starting value. Investors participate 1:1 in the performance of the underlying index up to a maximum of +30% of the starting value. Thus, the maximum coupon amount is limited to EUR 300 per nominal value of EUR 1,000. Investors also participate in a slight decline of the index up to a maximum of -10%. In case of a negative performance of the underlying index of more than -10%, the capital protection of 90% applies.

The term of the certificate is eight years. Raiffeisen Centrobank provides permanent liquidity for the certificate during the whole term. **This means it is possible to sell the certificate at current market price anytime before the maturity date (11.06.2029).**

Additional information on the financial instruments described herein may also be obtained from the respective key information documents that are available for download on the website of Raiffeisen Centrobank AG ([www.rcb.at](http://www.rcb.at)). The price of the Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Certificate during the term. If the Certificate is sold prior to the end of the term, there is the risk to incur a substantial loss of the invested capital (market risk). The capital protection of 90% of the nominal value applies solely at the end of the term. During the term, the price of the Capital Protection Certificate may drop below the agreed capital protection amount. During the term, the Capital Protection Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Certificate is sold prior to the end of the term, there is the risk to incur a partial loss of the invested capital. The Capital Protection Certificate's final terms may provide for a maximum payout. If the underlying is not quoted in the same currency as the Capital Protection Certificate and if the Certificate is not currency hedged, the foreign exchange rate influences the Capital Protection Certificate's price during the term (currency risk). Dividends and similar rights associated with the underlying are taken into account when structuring the Certificate and are not paid out.

Issuer Risk/Creditor Participation ("bail-in"): Any payments for structured securities during the term or at the end of the term depend on the solvency of the issuer (issuer risk). Investors are exposed to the risk that Raiffeisen Centrobank AG as an issuer might be unable to fulfil its obligations in respect of the described financial instruments, such as in the event of insolvency (inability to pay/over-indebtedness) or a legal order to initiate resolution measures. The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. A total loss of the capital invested is possible. More detailed information is available at [www.rcb.at/en/basag](http://www.rcb.at/en/basag). Under certain circumstances, the issuer has the right to redeem the certificate prior to the maturity date. A total loss of the capital invested is possible.
